### A Terrible Accident Occurs in Jersey City by Which 22 Men Lose Their Lives.

### The Tunnel Under Hudson River Caves in and Buries the Men Under the Debris.

### Trouble Brewing with Spain—Another Fast Express Train to the East.

### The Attorney General Decides That Payne, of Indian Territory, is the Offender.

New York, July 21.—At five this forenoon, the caisson leading to the entrance of the Hudson river tunnel, constructed at 16th street, Jersey City, caved in, carrying with it an immense quantity of earth. 21 men were buried, and 7 were soon taken out bruised, but not seriously, and the rescuers were laboring hard to reach the remaining 14. Meanwhile the water from the river was flowing in rapidly and the steam fire engines were set to work to save those who might still be alive from drowning. The workmen resided in the vicinity, and a very large and excited crowd of persons soon congregated.

A later dispatch says that it now appears that 21 lost their lives, while 8 had almost unobscuredly escaped. The night gang of 30 men, including the Ass's tag super's aidmen, Woodward, and 2 firemen, entered the shaft at midnight; the hours of work for this gang being from 12 to 8. The depth of the shaft is 65 feet; and while most of the men were employed at the bottom of the shaft, about one-third of the gang was engaged on the brick wall of the shaft. It was the latter squad, at a dark layer, that escaped. The main caisson of the tunnel runs out from the shaft for a distance of about 30 feet, when it opens into a second shaft, and that is where the tunnel is supposed to have caved in. The air lock was not properly adjusted when the process of sinking commenced; the brick wall connecting the two arches gave way and the water rushed into the cave.

The official report from the tunnel disaster says that 28 men were in the tunnel at the time of whom 8 escaped and 20 were drowned. The cause given is, that probably the men did not watch the brick wall of the working shaft as closely as they should. The accident will stop work for three weeks. When 8 men had got on, another workman, in trying to pass through the door leading from the air lock into a temporary chamber of the tunnel, was jammed in the door, and despite the efforts of those ahead he could not be brought out as the door closed upon him and held him fast. Woodward, the Ass's tag Superintendent, told the men to try and get on, and when the man was fastened in the door, he cried out to those escaped, to try to get him out and get assistance, to help the man and himself who were jammed in. He refused to leave himself, saying he would stay and make every effort to get the rest out, and if it were not possible, then those escaping must try to get the rest and himself out alive. The complete list of those saved are Thomas Brady, B. McGovern, A. J. Moline, Thos. Cummings, Carl Hansen, J. VonOstrae, John Doyle and James Haydes.

The officers of the company in explaining the accident, say that the workmen in coming through the air lock, must have exercised unusual carelessness, and both of the doors of the air lock being open at the same time, the compressed air was allowed to escape. The compressed air serves a double purpose, namely: to keep the water out and support the roof of the tunnel; so when it escaped the catastrophe was inevitable.

The workmen were busily engaged this afternoon digging up a strong pump for the purpose of drawing out the water from the well; the water is also for drawing water out of the tunnel, which is filled to the extreme limit, which has been ascertained by the engineers, by the test of a pump, to force compressed air into the cavity. The water in the shaft has fallen about ten feet since this forenoon in consequence of the receding

of the tide. Every now and then the surface in the center would be disturbed by numerous air bubbles, and at times would appear as if boiling; but no danger is said to be due to the fact that some of the earth or masonry is falling constantly in the tunnel, and need displacing it produces this effect. The engineers said officials say that it is impossible for any of the imprisoned workmen to be five feet from the whole length of the tunnel is up to the roof and even above the laborers when making observations west of the shaft; the workmen, however, will not cease until they get where the bodies are supposed to be; but it is impossible to carry air into the tunnel, as that which has been forced in so far has escaped through the shaft, in which has made the water leap up two or three feet above the surface. It is feared that after seven men had been saved, as one named Thos. Cummings was reported by one of the workmen to have escaped, is now said to be missing.

Washington, July 21.—The state department is in receipt of information that the vessel which recently fled on two American schooners in Cuba was the *Carre*, a small screw steamer belonging to the Spanish navy. No formal presentation of the case will be made to the Spanish government until the report of the admiral who was yesterday ordered with the *Tennessee* to Havana, has been received. Though the Spanish authorities have not yet decided that the firing was done by a vessel of the Spanish navy, Assistant Secretary Hay is of the opinion that such a decision was based upon the fact that the vessel of the previous report of a vessel of the Spanish navy, as to the name of the offending vessel. He is of the opinion that the vessel of the firing and the identity of the vessel can be fully established, and that the Spanish authorities will see in justice of a claim that they have always made a right to fire upon or detain such vessels when a war marne language of the Spanish government has always resisted his claim there is no reason to suppose any departure will be made at present from the usual policy. It is believed the whole matter will be formally discussed at the cabinet meeting today.

Council Bluffs, July 21.—An important rumor, seemingly based on fact, is circulated in railway circles here today, that the Wabash, St. Louis & Pacific road, which connects with the Union Pacific at this point, will Sunday next put on a regular through, fast express train from Council Bluffs to New York. By this arrangement, the express train will leave this city every day at 4:30 in the afternoon, arriving at St. Louis between 7 and 8 o'clock the next morning, and reaching New York from twelve to fifteen hours ahead of all other lines.

San Francisco, July 21.—A Portland dispatch mentions the threatened trouble between the whites and Indians in eastern Oregon and Washington, owing to the encroachments or settlers on Comas Valley, from which the Indians have been accustomed to procure their annual supply of Comas root. The Indians threaten to take forcible possession unless the whites leave.

Chicago, July 21.—The Times says: A gentleman from Maine informs the Times correspondent that the Boston Democratic Greenback alliance in that state will certainly fall to pieces before the election. Flatists object to the presidential electors named by the bournons, on the ground that they are hard money men and sympathetic with the rebellion.

Cape Town, July 21.—In the assembly, the Colonial Secretary announced that some Basutos on surrendering their arms were attacked by hostile Basutos. Steps have been taken to ensure the execution of the disarmament act.

Saratoga, July 21.—The mile dash was won by Charley Gorham; Col. Sprague, second; Dank, third. Time: 1:46 1-4; Pomeroy won the hurdle race; Waller, second; Faustina, third.

Auburn, N. Y., July 21.—Patrick Swayne has confessed that he and Horace Exner, murdered Henry Page at Montezuma eight years ago. Remorse led to the confession. Both have been arrested.

Chicago, July 21.—Secretary Schurz will go to Wisconsin for a few days before starting west, and it is hoped he may be persuaded to speak at the great republicans meeting Saturday evening. His family is with him.

The Journal's Washington special says the Government coast survey has several parties at work in the interior. The most important undertaking in the process is the measurement of the arc of the 39th parallel.

The object is to connect the Atlantic and Pacific systems of survey to form a basis from which all states and territories can be surveyed with the utmost accuracy both north and south. Of this starting point, up to date, several hundred miles of this geodesic survey has been completed, and another party is at work near Colorado City working eastward to connect in time with the arc, being measured east from Jeff City, another party working near Austin, Nev., and moving east to connect ultimately with the line of Colorado City. The parallel from Austin, Nev., to the Pacific Coast has been completed, and another party in West Virginia are working west with the view ultimately to connect their work with that of the party working east from St. Louis. The character of the work is of the highest known to this branch of science, and when fully completed will be of incalculable benefit to all scientific, local or state surveys.

Attorney General Devens decides that Payne is the only Indian Territory squatter who can be prosecuted, he being the only one who has twice offended. The fine is \$100.

A number of democratic leaders are to meet at the White Sulphur Springs, Va., Saturday, when an effort will be made to harmonize the two factions in that state.

St. Petersburg, July 21.—Should the dispute with China not lead to war, it is possible that the Russian fleet will go to the Corea, towards which the Russians look with longing eyes. The papers urge its annexation as of great importance to Corea as the basis for a privateer, only Russian weapons against England, is sufficient to warrant that undertaking.

Berlin, July 21.—It is stated on good authority that several officers of the general staff who are ready to go to Constantinople to re-organize the military institutions of Juarkeny, leave the German service, but will be allowed to resume their present rank after the performing of their task in Turkey. The affair is to be private and the Government will not be responsible therefore.

St. Petersburg, July 21.—The Czar has declined to receive Marquis Tzeng, the Chinese ambassador, declaring, in view of the Chinese rejection of a former treaty of St. Petersburg, there is no longer place for the solution of the Kuldja difficulty.

Saratoga, July 21.—Sioux won the three quarter mile dash; Lady Middleton, second. Time: 1:16 1-2. Fortunate sold in the pools at 500 to 100. In the second race, mile and 1-2, Tuerrere won; Day Star, second. Time: 2:45 3-4.

Carlisle, Pa., July 21.—There was a terrific rain storm last night, the water running four feet deep in the road side. Many houses were flooded, and the crops are severely injured. Many cattle were killed by lightning.

New York, July 21.—This morning steamer Dessong, having the obelisk in her hold, steamed up the north river and anchored off 23d St., where she will probably be for two days.

New York, July 21.—The Democratic committee met this afternoon and appointed a committee of three to encourage and promote naturalization and protect naturalized voters throughout the state. A resolution was adopted counseling harmony in the party throughout the state.

London, July 21.—It is intimated that the Bank of France will probably raise the rate of discount to prevent the export of gold.

Galveston, July 21.—Gen. Chambers, the greenback candidate for vice-President will withdraw on account of ill health.
